

FOUR SEASONS MONTREAL MONTREAL, QC, CANADA

Delivering Luxury and Acoustic
Excellence

PREFACE

The Four Seasons Hotel Montreal, completed in 2019, stands as a symbol of luxury and elegance, offering an intimate connection with the city through its minimalist yet refined design. AcoustiTECH was chosen to provide an advanced acoustic solution to meet the stringent standards required for a world-renowned luxury hotel. AcoustiTECH was brought on board to ensure that the acoustic environment within the hotel and its private residences was of the highest standard. The goal was to provide guests and residents with unparalleled comfort by reducing noise disruptions, ensuring a serene and peaceful atmosphere in both public and private spaces.

CHALLENGE

The Four Seasons Montreal project required acoustic solutions that aligned with the brand's reputation for luxury and tranquility.

The challenges were to :

- *Create an environment where guests and residents would experience superior comfort, free from the noise of the bustling city.*
- *Have high-end design and aesthetic demanded acoustic solutions that integrated seamlessly into the building's architecture without compromising its luxury appeal.*

ACTION

The **AcoustiTECH 7000** and **AcoustiTECH AD532+** system was selected for its ability to deliver top-tier acoustic performance while blending seamlessly into the building's design. AcoustiTECH collaborated closely with the architects, developers, and acoustic engineers to ensure the system's flawless integration, providing ongoing consultancy and support throughout the installation process to achieve the desired acoustic environment.

PROJECT SPECIFICATIONS

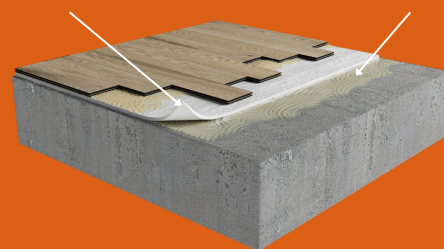

- **Total Area Delivered by AcoustiTECH** : 90 000 sq. ft.
