

SILENT FLOOR TEX

UNDERSCREED MEMBRANE MADE OF
RECYCLED TEXTILE FIBRE AND RECYCLED

RECYCLED

The bottom felt is composed of textile fibres derived from production waste, which are then carefully examined and selected.

ACOUSTIC PERFORMANCE

Tested at the University of Bologna according to international standards for acoustic characterisation.

FAST INSTALLATION

Thanks to the integrated adhesive band, installation is simplified by immediately attaching the selvedges to the overlaps.

COMPOSITION

polyethylene vapour barrier made from pre-consumer industrial waste

SILFLOORTEX15	1,10	5	15	5	3' 7 1/4"	16' 4 7/8"	0.59	54	12

(1) 1 m felt and vapour barrier + 0.10 m vapour barrier for overlap with integrated adhesive strip (3' 3 3/8" + 3 7/8")

(2) Without considering the overlap area.

WATERPROOF

Thanks to the polyethylene top layer, the product is perfectly impermeable to water and water vapour.

THE RANGE

Different thicknesses and thus technical specifications allow it to be used in different areas and for different screed thickness.
